

NORTHEAST

MISSISSIPPI COMMUNITY COLLEGE

O U R S U C C E S S S T O R Y

We are pleased to be recognized as an Apple Distinguished School for 2022-2025 for our continued dedication to transforming learning environments with technology. Our student-first vision drives efforts to continually reimagine education and personalize instruction to meet the needs of those we serve.

VISION

Northeast is always looking forward in an effort to examine our current practices and improve student learning. We are committed to helping students and educators develop the capacity to meet challenges and effectively implement technology in the context of teaching and learning.

LEARNING

Using iPads, teachers are crafting engaging lectures, encouraging student agency, and stretching beyond the classroom to move forward with technology in education to inspire students to reach their full potential.

SUCCESS

With iPads in the hand of every student, engagement has increased, students have a higher grade point average when transferring to a four-year college, and students who take a developmental course have a higher success rate than those at other schools.

Campus Demographics

- Public Community College
- 3200+ students
- 350 employees

Apple Products & Services

Moving Forward

Northeast strives to push the boundaries and transform learning environments with technology. Whether it's crafting engaging lectures, putting content creation in the hands of students, or breaking barriers outside of classroom walls, we are moving forward with technology in education to inspire students to reach their full potential.
